Highlights

Blooming

Inspired by the notion that designs come to life like a flower in full bloom, the theme of this year's Atrium special zone is 'Blooming'

Whether it's home décor or a gift, all items are designed and discovered in a way that is similar to the life cycle of a flower. Every moment is beautiful.

The intimacy and booth design of this special zone gives the creations of each exhibitor the chance to blossom and shine. We hope you find new inspiration by meeting the various personalities and perspectives of Blooming's designers.

What is upcycling? #2

"We want to reduce discarded materials as much as possible in the manufacturing and distribution process."

"We want to find value in the dead stock that is discarded."

Amid growing awareness of the environment, sustainability is the essential element for product development.

This showcase presents possibilities for upcycling in collaboration with architects and manufactures companies.
